2015 Pest Control Business License Registration Notice

News

On July 1, 2014, rodenticides with the active ingredients: **Brodifacoum, Bromadiolone, Difenacoum, Difethialone**, commonly known as **Second Generation Anticoagulant Rodenticides (SGARs)**, were designated as California Restricted Materials. In addition, **Title 3 of the California Code of Regulations section 6471** supplements **label restrictions** on the use of **SGARs**. Contact your inspector to learn more about these new regulations.

Save time! Save money! Over half of agricultural pest control businesses now use **CalAgPermits** to submit pesticide use reports saving time and effort. If you are not already using on-line reporting, give it a try. If you are a **dual licensed company**, be sure to report your usage under the appropriate license number: agricultural pesticides under your agricultural license number and structural pesticides including SGARs under your structural license number. Visit our website at www.sdcountry.ca.gov/awm/envreg.html or contact your inspector for more information to get started.

You play an important role in **bee protection**. If you apply pesticides which say “**toxic to bees**” on the label, we strongly encourage you to visit our website www.sdcountry.ca.gov/awm/pesticides.html or call your inspector to learn more about your important role and responsibilities in bee protection.

If you need to obtain a **RESTRICTED MATERIALS PERMIT**, please call your inspector or (858) 694-8980 for an appointment. **Permits cannot be issued without an appointment.**
